LETTER OF TRANSMITTAL

BALTIMORE, MD., February 28, 1910.

To His Excellency

Austin L. Crothers,

Governor of Maryland.

SIR: Pursuant to the requirements of the statutes creating this Bureau, I have the honor to herewith submit the Eighteenth Annual Report of the Bureau of Statistics and information for the year 1909.

Most respectfully,

CHARLES J. FOX,
Chief.

INTRODUCTION.

In presenting this, the Eighteenth Annual Report of the Maryland Bureau of Statistics and Information, and the sixth during my term of office, I do so with a view of accounting to the Governor of the State for my stewardship, and also for the purpose of furnishing the public in general, as well as the members of the General Assembly, with information not otherwise obtainable. From the results accomplished by the enforcement of the Child-Labor and Factory Inspection Laws, the number of positions secured for the unemployed, the adjustment of differences between employer and employe, and the information furnished almost daily to those within and without the State, I venture the assertion that much good has been accomplished and that the Bureau of Statistics and Information is a most useful adjunct to the State Government.

CHILD LABOR.

The results accomplished under the Child-Labor Law during the past year were most gratifying and form an interesting chapter. Of the 7,640 children who applied for permits in 1909, 6,803 received them, and 837, or 12 $\frac{1}{3}$ %, were refused. Of these 505 were forced to return to school. While inspecting 21,557 places throughout the State, to see that no child was employed without a permit, improved conditions have been brought about, by having fire escapes provided in some cases, and requiring that better light, ventilation, air space and general sanitary conditions be provided in others. Because of co-operation on the part of employers with this Bureau in the enforce-

ment of the law, now that it is thoroughly understood, only 4 arrests were made during the year, as compared with 9 in 1908 and 42 in 1907. The tables show the number of inspections made, the number of children engaged in various occupations in Baltimore City and in the counties by age, sex and color, the average earnings, the number of permits issued, the number of children who were refused permits and the various reasons for refusal, also the number of children who were forced to return to school, the number of arrests for violation of the law, the causes and disposition of the cases.

I respectfully recommend that the following changes be made in the Child-Labor Law:

1. Raising the age limit when children can be employed from 12 to 14 years.
2. Repealing that section of the law which exempts from its operation children under 12 years of age in the counties from June 1 to October 15.
3. That provision be made for compensating the health officers in the counties for their services.

FACTORY INSPECTION.

The work of inspecting those places coming under the Factory Inspection Law has been steadily performed during the year. The number of permits outstanding December 31, 1909, was 2,609, authorizing the employment of 61,733 men, women and children in the manufacturing of the different articles coming under that law.

Of the 61,733 persons employed only 3,175, or about 5%, worked in their homes, while 58,558, or 95%, were employed in factories under better sanitary conditions, and where the articles made do not come in contact with the families.

The number of rooms and premises reported dirty in 1909 was less than in 1908, while the number of inspections was greater, and only one arrest was made dur-

ing the year for violating the law. These conditions have helped to establish the high standard that Baltimore-made garments have attained, as in no other city is clothing made under better sanitary conditions, which fact is appreciated by the manufacturer and wearer alike. The tables show the number of permits issued, the number of persons authorized to work thereunder, articles made, number of cubic feet of air space to each person, the sanitary condition of the workrooms and premises and the number of arrests made for violations of the law and the disposition of the cases.

I respectfully recommend the following changes in the Factory Inspection Law, which I consider will further improve the conditions:

1. That this Bureau be empowered by law to remove consumptives from the workrooms.
2. That the law be so amended as to give police magistrates jurisdiction as in the Child-Labor Law.
3. That all employers of labor be required to report to this Bureau all fatal accidents and all non-fatal accidents entailing a loss of twenty-four hours or more, and that the Bureau be required to keep a record of and publish the same annually.

FREE EMPLOYMENT.

Because of the improved conditions among the laboring classes the number of persons applying at the Free Employment Agency of the Bureau for positions during the year 1909 was less than in 1908, while the number of positions secured was greater. The number applying for help in 1909 was somewhat less than in 1908.

COST OF LIVING.

In this chapter is given the retail prices of the principal household necessities obtained in one of our retail

markets from month to month during the entire year, and also at 230 grocery stores in every section of the city of Baltimore. The difference between the prices of 1909 and 1892 (which was the first year this Bureau gathered these statistics) shows the enormous increase of 51.46%, while the wages have remained practically the same.

STATE MAP.

The next chapter calls attention to several important features, including the State roads, as shown by a map of the State, with revised information, and is followed by tables showing the acreage and value of farm products of the leading Maryland crops, and the number, average price and farm value of all animals in the State, including sheep, with the value of their clip.

This is followed by a table showing the current prices of grain during the year, the report of the State Roads Commission and the work done by them during the year, and by another table showing the value of the mineral products.

STRIKES AND LOCKOUTS.

While the number of industrial disturbances during the year 1909 was less than in 1908, the number of persons involved was nearly double, and the loss in wages was nearly eight times as great, there being 4,852 persons involved in 1909, in 13 strikes, with an estimated loss in wages of \$317,600, while in 1908 there were 2,522 persons involved in 16 strikes, with an estimated loss in wages of \$41,424.40. Of the 13 strikes 4 were successful, 4 were partially so, 2 remain unsettled and 3 were unsuccessful.

Eleven of the thirteen strikes were organized and two were unorganized.

IN LABOR CIRCLES.

The usual list of labor organizations is given with the important changes that have occurred during the year.

NEW INCORPORATIONS.

A complete list of the new incorporations recorded in the State during the year is given, with city and counties separate, and their total capitalization and how divided.

IMMIGRATION.

Reference is made to the great increase in the number of immigrants landing at the Port of Baltimore during the year, and comparisons made between the years 1909, 1908 and 1907.

ANNUAL CONVENTION OF OFFICIALS OF LABOR BUREAUS.

The Twenty-fifth Annual Convention of Officials of Labor Statistics of America met at Rochester, N. Y., in joint session with the International Factory Inspectors, during the month of June, resulting in much good to both organizations.

I take this occasion to express my sincere thanks and appreciation to all those who have furnished this Bureau with information from time to time during the year, especially the secretaries of the trades unions and other labor organizations, proprietors of manufacturing and industrial concerns, all of whom have assisted us materially by furnishing data for the compilation of this report.

In conclusion, I beg leave to acknowledge, with thanks, the valuable assistance rendered by the entire office force, especially my assistant, Mr. Frank Armiger, for his diligence and untiring efforts in the gathering of the data furnished in this report.

CHILD LABOR

The issuing of permits to 5,394 children between the ages of 12 and 16 years who were able to read and write, and the refusal to issue permits to 737 children who were not able to meet these requirements, were too delicate or were under 12 years of age (there being 119 of the latter), is part of the work that has been going on at the office of the Maryland Bureau of Statistics during the year 1909. Of the 5,394 permits issued 270 were duplicates, as compared with 5,177 permits in 1908, of which 333 were duplicates. Of the 5,394 permits issued in Baltimore City in 1909 3,057 were males and 2,337 were females, while in 1908 2,977 were males and 2,200 were females. Of the permits issued in 1909 we find a greater number were issued to children between the ages of 12 and 14 years than between 14 and 16, there being 2,771 of the former, of whom 60 were colored, and 2,459 of the latter, of whom 104 were colored.

In addition to the work in the office our Inspectors have been constantly visiting all places throughout the State where children are employed to see that no child is permitted to work who has not secured a permit, and the number of places inspected in the State was 21,657, in addition to 2,141 second inspections.

Besides compelling all employers of children to keep on file a permit for each child employed, a great deal of good has been accomplished by having fire escapes provided in some cases where the means of escape in case of fire were not sufficient, and also in having better ventilation, light, air space and general sanitary conditions provided in a number of cases.

The results accomplished have been most gratifying, as the trouble experienced by this department when the law first became operative no longer exists. But instead we find a general disposition on the part of the employer to assist us in its enforcement, realizing that it is not only an inherent right due the boys and girls, but that it has greatly improved the standard of their help. Because of this co-operation only 4 arrests were made during the year for violations of the Child-Labor Law, as compared with 9 in 1908 and 42 in 1907. Of these 1 was for refusal to permit our Inspectors to enter premises for the purpose of ascertaining if any children were employed there. After the Inspectors called several times and explained the object of their visit, and not being allowed to enter, a warrant was sworn out for the arrest of the parties. When the case came to trial it was dismissed, after the defendants had paid \$15.00 costs, and had expressed a willingness to allow our Inspectors to enter their premises any time in the future that they demanded entrance. In one of the other cases the party was fined \$20 and costs; in another \$5 and costs, and the fourth case was dismissed. It may be interesting to some to know that since September 1, 1906, when the Child-Labor Law first went into effect, this department has examined 36,125 children; has issued permits to 32,639, of whom 19,169 were males and 13,470 were females, and has refused to issue permits to 3,486 children, because they were unable to read or write, or were too delicate. We regret to state that we find a desire on the part of some parents who are allured by a slightly increased revenue to hire out their children to work before they are able to read and write simple sentences in the English language, or even before they have reached the age of 12 years, at the expense of their morals, as well as of physical development, and to the exclusion of matured labor. Some of these are willing to swear falsely to their children's ages in order to accomplish their purpose. It must be added

that some are impelled by necessity to find employment for their children who are under age.

On the other hand, it is very consoling to find that a great majority of parents are concerned about the future morals of their children, and realize that a well-developed body and a mind trained by education means more to them than the small wages the children earn, and are not only willing to deny themselves for their sake, but are anxious that all these advantages may be accorded them.

Our attention is frequently called to the fact that there are a number of small children employed in stores and factories who should not be permitted to work. This is not a fault of the Bureau, but the fault lies in the law, which fixes the age at which children can be employed at 12 years instead of 14.

In our last and present reports we have recommended the raising of the age limit to 14 years, and trust that the present Legislature may deem it wise to make this change, as Maryland is one of the very few States where children are permitted to work at this tender age.

Of the 5,394 permits that were issued in Baltimore City it may be of interest to know the months in which the greatest number were issued. The month of June leads in number, with 838 to its credit, with July, September, May, October, April, August and March next in the order named.

In addition to the 5,394 permits that were issued in Baltimore City there were 1,409 issued in the counties, making the total number issued in the State during 1909 6,803, of which 3,894 were issued to males and 2,909 to females.

Of the counties in which the 1,409 permits were issued Baltimore County leads in number, having 541 to its credit, with Allegany a close second with 449, and Washington County third, having issued 186 permits. Of the 837 children who were refused permits 119 were under 12 years of age, 128 were too small, 32 too delicate,

462 were not able to read or write, 62 could not read and 34 could not write. The names and addresses of the 737 children who were refused permits in Baltimore City were sent to the Department of Public Instruction for their investigation, and from the results furnished us by them 505, or 68½%, were forced to return to school; 47 were living outside the city limits and were not effected by the law; 26 had moved, or were not located; 27 had received permits, and were at work; 39 were working at home or at service; 12 were over 16 years of age; 6 had doctors' certificates, which excused them from attending school; 5 had been placed in institutions, and 70 have not yet been reported on.

The changes recommended to be made in the Child-Labor Law, in addition to that of raising the age limit at which children can be employed from 12 to 14 years, are as follows: To repeal that portion of the law which exempts children under 12 years of age in the counties from June 1 to October 15, so as to make the law apply to those in the city and counties alike; that provision be made whereby the health officers in the counties will be compensated for their services. I would suggest that a fixed price should be paid for each applicant whether the permit is issued or refused, as in cases where they are refused the same amount of work is required, such as recording their names, addresses, age, sex, color, date and reasons for refusal.

Summary of Inspections

This summary includes the persons employed in the manufacturing of the seventeen different articles coming under the Factory Inspection Law. They are also included in the tables which follow, and are designated by an asterisk (*).

It is important to know the number of persons engaged in the various industries inspected in Baltimore City and the counties of Maryland, and also the occupations in which they are engaged.

The total number of persons employed is 182,289, divided as follows: Males 133,982, females 48,307. Between the ages of 12 and 14 years there were 831 males and 725 females; between the ages of 14 and 16 years there were 3,371 males and 2,748 females.

Number engaged in the manufacturing industries, 111,600, of whom 79,789 were males and 31,811 females; between the ages of 12 and 14 years there were 605 males and 615 females; between the ages of 14 and 16 years there were 2,271 males and 2,315 females.

The number employed in stores, offices, etc., 70,689, of whom 54,193 were males and 16,496 were females; between the ages of 12 and 14 years there were 226 males and 110 females; between the ages of 14 and 16 years there were 1,100 males and 443 females.

The above figures show that of the children employed in the manufacturing industries the females outnumber the males by 54, while in the stores, offices, etc., the males outnumber the females by 783.

For our own convenience in inspecting we have divided the city of Baltimore into seven districts—A, B, C, D, E, F and G. The tables that follow give the number of persons employed by age, sex and industries by districts.

As shown by Table E, the number of persons employed in the manufacturing industries in Baltimore City were 95,812, of whom 58,544 were males and 27,268 were females. Between the ages of 12 and 14 years there were 384 males and 505 females; between the ages of 14 and 16 years there were 1,620 males and 1,847 females, which exceeded the year 1908 by 431 children under 16 years of age.

The largest number of children were engaged in the manufacturing of shirts, overalls and drawers. The next largest number in the manufacturing of cotton duck, with clothing, candies, wooden boxes, cigars and cigarettes, printing and publishing, hats and caps, tin cans and paper boxes next in the order named.

The number of persons employed in stores, offices, etc., in Baltimore City, as shown by Table F, was 65,035, of whom 49,959 were males and 15,076 were females. Between the ages of 12 and 14 years there were 198 males and 108 females. Between the ages of 14 and 16 years there were 981 males and 419 females, which shows that there were 168 less children employed in stores, offices, etc., in 1909 than in 1908. Of the 1,706 children 1,268 were employed in retail stores, divided as follows: Males 1,179, females 527.

We have ascertained whenever possible the weekly earnings of children under 16 years of age engaged in the various industries, and from the figures gathered we find the average for Baltimore City for children engaged in the manufacturing industries to be \$3.45 per week. For those employed in stores, offices, etc., \$2.98 per week, which shows a reduction in the weekly earnings from the year 1908, in both manufacturing industries and stores. The average earnings for that year were \$3.64 and \$3.11 respectively.

Table G gives the number of persons employed in the manufacturing industries inspected in the counties.

Baltimore County leads in number, with 9,735, of whom 9,083 were males and 652 females. Between the ages of 12 and 14 years there were 59 males and 14 females; between the ages of 14 and 16 years there were 208 males and 116 females.

Allegany County follows, with 5,483, of whom 4,913 were males and 570 were females. Between the ages of 12 and 14 years there were 40 males and 23 females; between the ages of 14 and 16 years there were 217 males and 119 females.

Hours of labor required per day in manufacturing industries reported in the counties of Maryland—47, 8 hours; 85, 9 hours; 14, $9\frac{1}{2}$ hours; 267, 10 hours; 12, $10\frac{1}{2}$ hours; 2, $10\frac{3}{4}$ hours; 13, 11 hours.

Results of Inspection in Baltimore City by Districts

DISTRICT A.

Number of places inspected—2,827.

Character of business in places inspected—Manufacturing 973, wholesale stores 93, wholesale and retail stores 67, retail stores 1,454, offices 212, places of amusement 13, banks 7, transfer 1, transportation 7.

Total number of persons employed in places inspected—18,313, of whom 12,340 were males and 5,973 were females. Between the ages of 12 and 14 years there were 117 males and 91 females; between the ages of 14 and 16 years there were 476 males and 370 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$3.41; stores, offices, etc., \$2.80.

Sanitary condition of premises reported good.

DISTRICT B.

Number of places inspected—3,931.

Character of business in places inspected—Manufacturing 1,590, wholesale stores 40, wholesale and retail stores 86, retail stores 2,122, offices 63, places of amusement 9, banks 5, hotels 6, transfer 9, transportation 1.

Total number of persons employed in places inspected—16,718, of whom 11,974 were males and 4,744 were females. Between the ages of 12 and 14 years there were 48 males and 44 females; between the ages of 14 and 16 years there were 245 males and 200 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$3.18; stores, offices, etc., \$2.83.

Sanitary condition of premises—3,921 good, 9 fair, 1 bad.

DISTRICT C.

Number of places inspected—3,425.

Character of business in places inspected—Manufacturing 996, wholesale stores 467, wholesale and retail stores 83, retail stores 1,437, offices 358, places of amusement 9, banks 12, hotels 4, transfer 20, transportation 39.

Total number of persons employed in places inspected—42,561, of whom 30,070 were males and 12,491 females. Between the ages of 12 and 14 years there were 108 males and 178 females; between the ages of 14 and 16 years there were 629 males and 694 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$3.50; stores, offices, etc., \$3.63.

Sanitary condition of premises—3,418 good, 7 fair.

DISTRICT D.

Number of places inspected—2,766.

Character of business in places inspected—Manufacturing 856, wholesale stores 7, wholesale and retail stores 24, retail stores 1,759, offices 109, places of amusement 5, banks 2, hotels 1, transfer 1, transportation 2.

Total number of persons employed in places inspected—14,994, of whom 11,937 were males and 3,057 females. Between the ages of 12 and 14 years there were 72 males and 77 females; between the ages of 14 and 16 years there were 210 males and 212 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$3.46; stores, offices, etc., \$2.81.

Sanitary condition of premises—2,765 good, 1 fair.

DISTRICT E.

Number of places inspected—5,689.

Character of business in places inspected—Manufacturing 1,493, wholesale stores 145, wholesale and retail stores 87, retail stores 2,002, offices 1,851, places of amusement 25, banks 26, hotels 22, transfer 23, transportation 16.

Total number of persons employed in places inspected—50,675, of whom 36,716 were males and 13,959 were females. Between the ages of 12 and 14 years there were 181 males and 164 females; between the ages of 14 and 16 years there were 863 males and 634 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$3.25; stores, offices, etc., \$2.94.

Sanitary condition of premises—5,683 good, 4 fair, 2 bad.

DISTRICT F.

Number of places inspected—687.

Character of business in places inspected—Manufacturing 218, wholesale stores 2, wholesale and retail stores 11, retail stores 411, places of amusement 8, offices 22, bank 1, hotel 1, transfer 13.

Total number of persons employed in places inspected—6,179, of whom 4,335 were males and 1,844 females. Between the ages of 12 and 14 years there were 51 males and 59 females; between the ages of 14 and 16 years there were 152 males and 152 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$4.06; stores, offices, etc., \$3.32.

Sanitary condition of premises reported good.

DISTRICT G.

Number of places inspected—426.

Character of business in places inspected—Manufacturing 128, wholesale stores 4, wholesale and retail stores 13, retail stores 260, offices 11, place of amusement 1, transfer 9.

Total number of persons employed in places inspected—1,407, of whom 1,131 were males and 276 females. Between the ages of 12 and 14 years there were 5 males. Between the ages of 14 and 16 years there were 26 males and 4 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$3.12; stores, offices, etc., \$2.47.

Sanitary condition of premises reported good.

Results of Inspections in Counties

ALLEGANY COUNTY.

Number of places inspected—240.

Character of business in places inspected—Manufacturing, 66 wholesale stores 5, wholesale and retail stores 3, retail stores 147, offices 2, places of amusement 7, banks 6, hotels 3, transportation 1.

Total number of persons employed in places inspected—6,710, of whom 5,768 were males and 942 females. Between the ages of 12 and 14 years there were 44 males and 23 females, and between the ages of 14 and 16 years there were 239 males and 119 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$3.64; stores, offices, etc., \$2.98.

Sanitary condition of premises reported good.

ANNE ARUNDEL COUNTY.

Number of places inspected—237.

Character of business in places inspected—Manufacturing 55, wholesale store 1, wholesale and retail stores 4, retail stores 166, offices 4, places of amusement 2, banks 3, hotels 2.

Total number of persons employed in places inspected—1,693, of whom 1,503 were males and 190 females. Between the ages of 12 and 14 years there were 17 males; between the ages of 14 and 16 years there were 13 males and 2 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$5.00; stores, offices, etc., \$2.44.

Sanitary condition of premises reported good.

BALTIMORE COUNTY.

Number of places inspected—411.

Character of business in places inspected—Manufacturing 118, wholesale and retail store 1, retail stores 290, place of amusement 1, transportation 1.

Total number of persons employed in places inspected—10,508, of whom 9,600 were males and 908 females. Between the ages of 12 and 14 years there were 63 males and 16 females; between the ages of 14 and 16 years there were 225 males and 124 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$4.21; stores, offices, etc., \$2.37.

Sanitary condition of premises reported good.

CARROLL COUNTY.

Number of places inspected—56.

Character of business in places inspected—Manufacturing 18, wholesale store 1, wholesale and retail stores 2, retail stores 31, banks 3, hotel 1.

Total number of persons employed in places inspected—553, of whom 385 were males and 168 females. Between the ages of 12 and 14 years there were 3 males; between the ages of 14 and 16 years there were 7 males and 13 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$3.52; stores, offices, etc., \$2.00.

Sanitary condition of premises reported good.

CAROLINE COUNTY.

Number of places inspected—37.

Character of business in places inspected—Manufacturing 7, retail stores 27, places of amusement 3.

Total number of persons employed in places inspected—162, of whom 123 were males and 39 were females. Between the ages of 12 and 14 years there was 1 male; between the ages of 14 and 16 years there were 8 males.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$4.50; stores, offices, etc., \$3.00.

Sanitary condition of premises reported good.

CECIL COUNTY.

Number of places inspected—109.

Character of business in places inspected—Manufacturing 30, retail stores 77, office 1, place of amusement 1.

Total number of persons employed in places inspected—1,078, of whom 946 were males and 132 were females. Between the ages of 12 and 14 years there were 5 males and 5 females; between the ages of 14 and 16 years there were 16 males and 10 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$4.07; stores, offices, etc., \$2.18.

Sanitary condition of premises reported good.

DORCHESTER COUNTY.

Number of places inspected—95.

Character of business in places inspected—Manufacturing 30, wholesale store 1, retail stores 61, offices 2, place of amusement 1.

Total number of persons employed in places inspected—710, of whom 417 were males and 293 were females. Between the ages of 12 and 14 years there were 2 males and 8 females; between the ages of 14 and 16 years there were 23 males and 17 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$3.03; stores, offices, etc., \$2.42.

Sanitary condition of premises reported good.

FREDERICK COUNTY.

Number of places inspected—143.

Character of business in places inspected—Manufacturing 39, wholesale stores 5, wholesale and retail stores 5, retail stores 86, office 1, place of amusement 1, banks 4, hotels 2.

Total number of persons employed in places inspected—1,341, of whom 950 were males and 391 were females. Between the ages of 12 and 14 years there were 17 males and 10 females; between the ages of 14 and 16 years there were 39 males and 30 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$2.78; stores, offices, etc., \$2.35.

Sanitary condition of premises reported good.

HARFORD COUNTY.

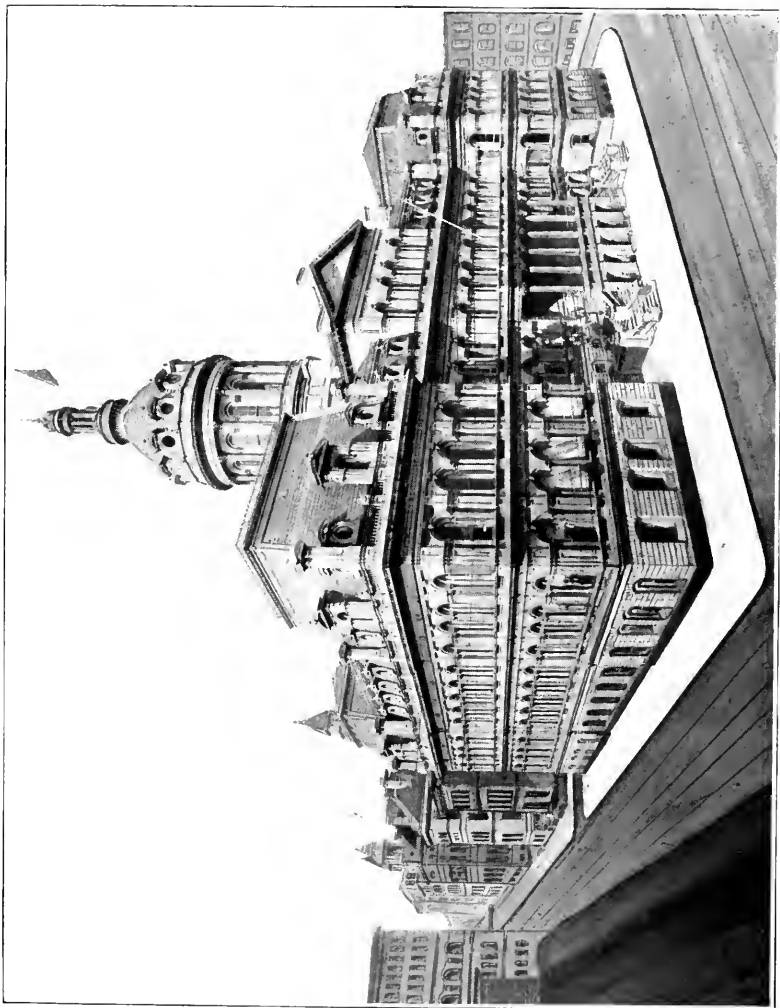

Number of places inspected—14.

Character of business in places inspected—Manufacturing 6, retail stores 8.

Total number of persons employed in places inspected—466, of whom 291 were males and 175 were females. Between the ages of 12 and 14 years there were 8 males; between the ages of 14 and 16 years there were 20 males and 4 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$4.35.

Sanitary condition of premises reported good.

CITY HALL, BALTIMORE.

HOWARD COUNTY.

Number of places inspected—5.

Character of business in places inspected—Manufacturing 5.

Total number of persons employed in places inspected—727, of whom 418 were males and 309 were females. Between the ages of 12 and 14 years there were 19 males and 17 females; between the ages of 14 and 16 years there were 29 males and 40 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$4.30.

Sanitary condition of premises reported good.

. KENT COUNTY.

Number of places inspected—24.

Character of business in places inspected—Manufacturing 3, retail stores 21.

Total number of persons employed in places inspected—180, of whom 126 were males and 54 females. Between the ages of 14 and 16 years there was 1 female.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$2.50.

Sanitary condition of premises reported good.

PRINCE GEORGE'S COUNTY.

Number of places inspected—2.

Character of business in places inspected—Manufacturing 2.

Total number of persons employed in places inspected—349, of whom 162 were males and 187 were females. Between the ages of 12 and 14 years there were 14 males and 1 female; between the ages of 14 and 16 years there were 4 males and 7 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$3.17.

Sanitary condition of premises reported good.

QUEEN ANNE'S COUNTY.

Number of places inspected—35.

Character of business in places inspected—Manufacturing 8, retail stores 24, office 1, hotel 1, place of amusement 1.

Total number of persons employed in places inspected—106, of whom 87 were males and 19 were females. Between the ages of 12 and 14 years there was 1 male; between the ages of 14 and 16 years there were 4 males.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$2.50.

Sanitary condition of premises reported good.

SOMERSET COUNTY.

Number of places inspected—81.

Character of business in places inspected—Manufacturing 20, wholesale stores 2, wholesale and retail stores 2, retail stores 49, offices 3, places of amusement 3, bank 1, transportation 1.

Total number of persons employed in places inspected—592, of whom 307 were males and 285 were females. Between the ages of 12 and 14 years there were 3 males and 3 females; between the ages of 14 and 16 years there were 12 males and 9 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$2.67; stores, offices, etc., \$1.67.

Sanitary condition of premises reported good.

TALBOT COUNTY.

Number of places inspected—29.

Character of business in places inspected—manufacturing 7, retail stores 20, places of amusement 2.

Total number of persons employed in places inspected—230, of whom 153 were males and 77 were females. Between the ages of 12 and 14 years there were 4 males and 1 female; between the ages of 14 and 16 years there were 2 males and 4 females.

Average weekly earnings of children under 16 years of age—In manufacturing industries \$2.58; stores, offices, etc., \$3.20.

Sanitary condition of premises reported good.

WASHINGTON COUNTY.

FACTORY INSPECTION

During the year 1909 the same course has been pursued in making inspections that was adopted in 1908, when the 6 Child-Labor Inspectors, in addition to the 2 Factory Inspectors, were required to fill out cards for all places where any of the 17 different articles coming under the Factory Inspection Law were manufactured. Consequently, during that year 2,007 first inspections were made, which included a great many merchant and ladies' tailors and cigar manufacturers that were never inspected before. In 1909, 2,052 first inspections were made, exceeding those of 1908 by 45, and I feel safe in the assertion that every place coming under the law in Baltimore City, and the State as well, has been inspected.

It has been the object of this Bureau, since the passage of the Factory Inspection Law in 1902, to lessen the number of tenements and dwellings in which clothing was often made amidst filth and sometimes of disease, and to increase the number of factories where there is ample light and ventilation and which have no communication with the homes. The results have been very satisfactory, as will be seen by Table No. 2, which shows that out of 61,733 people authorized to work in the manufacturing of clothing, etc., only 3,175, or about 5%, work at their homes, while 58,558, or 95%, are located in factories. We are also glad to report that the number of "Sweatshops" has been greatly reduced in the past few years. By the term "Sweatshop" is meant those places which contract with the manufacturer for the making of certain garments at a certain price and who sub-contract the same articles out to third parties at a less price, thereby

“sweating” them out of a certain amount of money, which is the middle-man’s profit.

Places of this character, where 10 or more persons were employed, numbered only 213 in Baltimore City in 1909, which is less in number than in any of the previous years. The Inspectors have been required to report on the means of escape in case of fire while making their inspections. This rule has resulted in the erection of a number of fire escapes, which were not provided theretofore.

There was only one arrest made under the Factory Inspection Law during the year 1909. The violation of the law in this case consisted in having more hands employed than was authorized by the permit issued. In consequence, the number of cubic feet of air space for each person was reduced to less than 400, which is required by law. The offender was fined \$5 and costs.

During the year 1908 there were eleven arrests made for violations under this law.

The small number of rooms reported dirty in 1909 was very gratifying. There were only 8, as compared with 15 in 1908, and the number of premises reported dirty was only 5, as compared with 12 in 1908, which is a decided improvement. These conditions have made the reputation of Baltimore-made garments the best, as in no other city is clothing manufactured under better sanitary conditions than in Baltimore.

In our last report one of the recommendations made was that this Bureau be empowered by law to remove consumptives from workshops, and I again urge the passage of such a measure. No matter how clean factories are kept, if those employed in making the several articles coming under the law are affected with tuberculosis, there is death in the garments. The considerable length of time a consumptive patient usually works before he becomes incapacitated makes the danger of spreading this deadly disease to a great number of people something appalling.

I respectfully renew the recommendation made by this Bureau in a previous report that the Factory Inspection Law be so amended as to give the police magistrates jurisdiction as in the Child-Labor Law. This change, I feel sure, would meet with the approval of the State's Attorney, as well as the public in general. It would have the same effect in correcting the evil that it has had in the Child-Labor Law, and would save delay and expense to those engaged in the business, and the annoyance of securing bail for the offender.

In my last report I recommended the passage of a law requiring all employers of labor to report to this Bureau all fatal accidents to employes and all non-fatal accidents, entailing a loss of 24 hours or more, and that this Bureau be required to keep a record of and publish the same annually. The passage of such a law, which has been adopted by nearly all the States, would, I am sure, lessen the number of accidents because of the publicity it would give to the facts connected with them, and would have a tendency to make employers more particular. This would also naturally reduce the number of accidents. I respectfully renew this recommendation.

WORK OF THE CURRENT YEAR.

During the year 1909 there were 862 new permits issued to manufacturers under the Factory Inspection Law, authorizing the employment of 16,200 people, making the total number of permits outstanding December 31, 1909, 2,609, authorizing the employment of 61,733 men, women and children in the manufacturing of the different articles coming under this law, of whom 58,558 were employed in factories and shops and 3,175 were employed in tenements and dwellings.

The total number of first inspections were 2,052, as compared with 2,007 in 1908, and the total number of second inspections was 834, as compared with 2,021 in

1908. This falling off in the number of second inspections was due to the fact that when the Inspectors finished their first inspections in 1908 they were sent back over the same ground, while in 1909 this was not deemed necessary, and only the most important places were inspected the second time.

The city is divided into seven inspection districts, which are bounded as follows:

District A, bounded as follows: Both sides of Baltimore Street, south to the harbor, and east side of South Street to the Eastern city limits.

District B, bounded as follows: From Baltimore Street north to North avenue, and from North Street to Eastern city limits.

District C, bounded as follows: From Baltimore Street south to the harbor, and east side of South Street west to Fremont Avenue.

District D, bounded as follows: Both sides of Fremont Avenue to Western city limits, and from North Avenue to Southern city limits.

District E, bounded as follows: Both sides of Baltimore Street, north to North Avenue, and both sides of North Street west to Fremont Avenue.

District F, bounded as follows: Both sides of North Avenue to Northern city limits, and from Guilford Avenue to Western city limits.

District G, bounded as follows: Both sides of North Avenue to Northern city limits, and both sides of Guilford Avenue to Eastern city limits.

The following tables give in detail the results of inspections of factories in Baltimore City, by districts, where articles coming under the Factory Inspection Law are made. Those places having store fronts are indicated by an asterisk (*):

TABLE No. 1.

TOTAL PERMITS ISSUED IN BALTIMORE CITY DURING THE
YEAR 1909 AND NUMBER OF PEOPLE AUTHORIZED
TO WORK THEREUNDER.

Factories and Shops	Number of Permits Issued		Number of People Authorized to Work.	
	1909	1908	1909	1908
Districts—A.....	113	114	1,996	2,429
B.....	90	128	1,211	1,701
C.....	60	151	4,365	12,388
D.....	24	36	915	1,868
E.....	120	313	6,424	8,949
F.....	7	7	31	31

G.....	5	3	8	6
Totals.....	454	927	1,286	2,699
Grand Totals.....	862	1,680	16,200	30,088

As will be seen by the above table, 862 permits were issued in 1909, authorizing the employment of 16,200 people, 408 being issued to factories and shops, authorizing the employment of 14,914 people, while 452 were issued to tenements and dwellings, authorizing the employment of 1,286 people, or about 8 2-3% of the number working in factories and shops. There were more than double the number of permits issued in 1908 over 1909, as a thorough inspection of the city was made during that year and a great many places were inspected for the first

time, while in 1909 the new permits were issued to those starting in business or to those who changed their former location.

The largest number of permits was issued in District A, with B, E, C and D next in the order named, while the largest number of people authorized to work was in District E, with Districts C, A, B and D next in the order named.

TABLE No. 2.

TOTAL PERMITS OUTSTANDING DEC. 31, 1909, AND NUMBER OF PEOPLE AUTHORIZED TO WORK THEREUNDER.

FACTORIES AND SHOPS	Number of Permits Outstanding	Number of People Authorized to Work
Districts—A.....	289	6,620
B.....	311	4,683
C.....	300	24,684

D.....	174	569
E.....	99	510
F.....	16	45
G.....	6	10
Totals.....	1,184	3,175
Grand Totals.....	2,609	61,733

The total number of permits outstanding December 31, 1909, as is shown by Table No. 2, is 2,609, authorizing the employment of 61,733 people, 1,425 being issued to factories and shops, authorizing the employment of

58,558 people, and 1,184 permits were issued to tenements and dwellings, authorizing the employment of 3,175 people. This is a very gratifying exhibit, as it shows that only about 5% of the people employed in the manufacturing of clothing and other articles coming under the Factory Inspection Law are employed at their homes, while 95% are employed in factories and shops, where the facilities and conditions are better.

Totals.....	2,052	834

Table No. 6 shows the total number of inspections made for the years 1908 and 1909 for the purpose of comparison, which shows that there were 1,142 less inspections in 1909 than in 1908, the difference being in the number of second inspections, as the number of first inspections in 1909 were 2,052, as compared with 2,007 in 1908, and the number of second inspections in 1909 was 834, as compared with 2,021 in 1908. This was because the Inspectors were sent back over the same ground after finishing the first inspections in 1908, while in 1909 only the most important places were visited the second time.

DETAILS OF INSPECTION.—TABLE 6.—DISTRICT F.

[illegible]

Results of the Work of the Free Employment Agency

From the figures shown in the following tables it appears that the laboring classes were more generally employed in 1909 than in 1908, as only 255 applied for positions during the former year, of whom 233 were males and 22 were females, while in 1908 425 applied, of whom 378 were males and 47 were females.

Notwithstanding the number of applicants in 1908 exceeded those of 1909, the number of positions secured were greater in 1909, which numbered 32, of whom 28 were males and 4 females, while in 1908 29 positions were secured, of whom 24 were males and 5 were females.

Those applying for help in 1909 numbered 50, of whom 39 desired males and 11 females, while in 1908 64 applied for help, 33 desiring males and 31 desiring females.

Table No. 1, which follows, gives the number applying for employment and the kind of work desired, and the applications for help and the number of positions secured.

TABLE No. 1.

COST OF LIVING

This is one of the most serious problems that confront the people at this time, not only in this country, but in European countries as well. In 1892, which was the first year that the prices of certain food products of a medium quality was gathered by this Bureau in various sections of Baltimore City from a number of grocery stores, as compared with the prices ascertained by the same method in 1909 of the same articles and quality of goods, show the enormous increase of 51.46%. It must be remembered at that time the combinations and trusts did not control the products of the country to the extent they do at the present time.

Table No. 1, which follows, gives the average prices by months, taken during the year in the Lexington Market by one of our daily papers, of the principal articles of food that go to supply the table of the average home. Of the 108 articles quoted 67 show an increase over 1908; 38 show a slight decrease, and 3 remain the same.

Table No. 2 shows the average prices ascertained from 230 grocery stores, in all sections of the city of Baltimore, of a medium quality of food products. Of the 36 different articles quoted 26 show an increase over 1908 and 6 show a decrease, and the prices of 4 remain the same.

While these prices were obtained by different methods, both of these tables show an increase over 1908.

The cause of these conditions seems to be largely with the middle-man, or those who come between the producer and the consumer. This statement is substantiated by the enormous difference in the prices paid to the farmer or the producer and that paid by the consumer to the dealer.

At all events, this difference in prices occurs between the time that the articles leave the hands of the producers and the time they are purchased by the consumer. When considering the great advance in the cost of living, the earning capacity of those who must bear this increased burden should also be taken into consideration. Therefore, we show, by the following table, the number of hours worked and the average earnings per day, the number of days employed during the year and the average yearly earnings of 1,054 persons engaged in 32 different occupations.

While we are unable to give the figures from the records of the Bureau on wages for the same period of time as that for which the cost of living is given, there seems to be no doubt that practically no advance has been made in the wages received by unorganized labor, such as clerks, drivers, salesmen, bookkeepers, etc., while those of skilled or organized labor have been slightly increased. The average wages of laborers in 1909 were less than \$400, and a number of those who are classed as skilled mechanics show an average of less than \$600, while some of those skilled in certain trades, and by thorough organization have been able to increase their earnings, but not in proportion to the increased cost of living, which has been forced upon the laboring classes during the past decade, by economic changes, over which they had no control, and which make it impossible for them to maintain their families as they formerly did. By this is meant the advance in prices of those articles that go to make up the family budget, and not the change that may have been made in the family expenditures from choice or to

maintain a better social standing. But for such changes in expenditures noted they would have been able to live in exactly the same way throughout the same space of time.

So serious is this great problem of "increased cost of living" that Congress is preparing to make an investigation into the causes of the great advance in prices of today, as compared to those of a few years ago.

STATE MAP

Considerable care has been given in preparing a map of the State, and the information it furnishes, including the State roads, which were advocated by His Excellency Governor Austin L. Crothers in his speech of acceptance at Baltimore, September 19, 1907, and it was largely due to his untiring efforts since he became Governor that they were finally adopted as are herein indicated.

The map shows which soils are best adapted to the raising of certain fruits and grains, also in what parts of the State lumber and certain minerals are found, the portions in which cattle are raised and that devoted to canning, while the waters of the Chesapeake Bay and its tributaries show where can be found the oysters, crabs, terrapin, the numerous varieties of fish and wild duck, etc.

The table showing the population both white and colored, area, number of farms, assessments, taxation by counties and Baltimore City, with county towns, the State tax rate and net debt of the State has been revised. Under the head of Maryland is shown the extreme width and length of the State, the area of the land and water, incorporated towns, population, white, colored, foreign and native born, and its rank as a State in manufacturing compared with its size. The number of farms in the State is given, the acreage of the same, number of acres improved, showing the different crops, fruit and dairy values and the output of its flour mills. The map also shows the number and value of live stock on the farms, the value of the wool clip, of lumber, coal, stone quarries, clay and mineral products, the capital invested in fisheries and value of the same, including oysters and crabs.

The number of mechanical and manufacturing industries, as shown by the latest Federal census, is given.

showing the capital invested, number of salaried officials, average number employed, total wages paid, cost of raw material and value of product.

Under the head of State educational facilities the number of schools and other State institutions are shown, also the number of pupils, teachers and the total expenditures for the same during the year.

Under the State finances is shown the balance on hand October 1, 1908, receipts and disbursements and the balance on hand September 30, 1909.

The total funded and net debts are shown and the assessed value of real and personal property. The number of miles of State roads surveyed, the number contracted for and the mileage graded and finished are also shown.

Under the head of Baltimore City is given its position among other large cities, population, population per square mile, area of city, harbor and parks, mileage of paved streets and railways, number of street lamps, public baths and their attendants, taxable basis and rate, assets and liabilities, number of public schools, number of pupils and teachers and the total yearly expenditures for school purposes.

The number of buildings is given, also the number of permits for new buildings, with cost of improvements. The cost of the Courthouse and City Hall are shown. The amount of park tax is shown, the rental from the subway system, the clearing-house transactions, balance in savings banks at the close of the year, and the number of depositors, receipts at the post-office, foreign trade entering the port, clearings and the value of the same, custom collections and exports of live stock.

The capital invested, number of wage-earners, cost of material and value of output are shown in a table giving seven of Baltimore's leading industries. Mention is also made of other important industries, and the table concludes with the number of unions comprising the Federation of Labor and its place of meeting.

State Roads

The following summary, as prepared by Chairman Tucker, of the State Roads Commission, shows the amount of work done during the year. He shows by counties the mileage and amount of contracts awarded, and also shows the work which is being done under the direct supervision of the State Roads Commission.

County	Road	Miles	Contract Price
Alleghany.....	Cumberland to Six-Mile House.....	5	\$38,738.93
Anne Arundel.....	Calvert Line toward Mt. Zion Church.....	4 81-100	13,253.45
Baltimore City.....	Falls road, from Third avenue to county line.....	69-100	41,614.25
Baltimore County.....	Philadelphia road, from city limits.....	1 95-100	25,174.40
Baltimore County.....	Harford road, from city limits.....	2 93-100	40,677.00
Baltimore County.....	Westport road, from city limits.....	1 57-100	39,810.37
Calvert.....	Anne Arundel line toward Prince Frederick.....	2 93-100	11,670.80
Carroll.....	Westminster toward Manchester.....	1 29-100	7,527.90
Charles.....	La Plata toward Prince George line.....	4 64-100	31,351.55
Caroline.....	North and South, from Denton.....	4 25-100	47,271.15
Caroline.....	Federalburg toward Hurlock.....	1	13,126.48
Dorchester.....	Hurlock toward Federalburg.....	5 51-100	45,847.77
Garrett.....	Oakland toward Thayerville.....	5 55-100	56,481.90
Harford.....	Aberdeen toward Churchville.....	4 43-100	36,787.30
Harford.....	Forest Hill to St. Ignatius.....	2	17,522.50
Howard.....	Frederick pike toward Sykesville.....	3 21-100	30,840.40
Kent.....	Chestertown toward Kennedyville.....	3 25-100	30,534.68
Prince George's.....	Marlboro to Meadows.....	5 75-100	56,367.70
Queen Anne's.....	Centreville toward Church Hill.....	3	32,458.30
Queen Anne's.....	Continuing to Church Hill.....	3 14-100	31,586.06
Queen Anne's.....	Chester River toward Church Hill.....	3	26,252.10
St. Mary's.....	Mechanicsville toward Leonardtown.....	5 25-100	54,495.50
St. Mary's.....	Leonardtown toward Mechanicsville.....	3 49-100	40,090.60
Talbot.....	Easton toward Wye Mills.....	3	28,986.50
Wicomico.....	From Shell road toward Mardela Springs.....	5 75-100	56,977.90

DIRECT WORK OF BOARD.

Other work is being done under the direct supervision of the State Roads Commission, as follows.

County	Road	Miles
Cecil.....	Oakwood to Porter's Bridge.....	3 12-100
Cecil.....	Rising Sun to Calvert.....	3 98-100
Worcester.....	Snow Hill toward Berlin.....	5 72-100
Carroll.....	Sykesville toward Eldersburg.....	1 59-100
Alleghany.....	Eckhart Mines to Garrett line.....	2
Montgomery.....	Rockville toward Gaithersburg.....	1
Somerset.....	Princess Anne toward Westover.....	3 4-100

The following table shows the acreage production, value of farm products and average value per acre of the principal Maryland crops for the year ended January 1, 1909. Of the 9 products given, wheat leads in point of acreage, with corn second, while potatoes lead in the average farm value per acre, with tobacco a close second. The total farm value of corn produced in the State during 1909 was \$15,317,000, which exceeds that of wheat by more than \$3,000,000.

The value of the hay crop for the year was \$5,760,000, potatoes \$1,823,000 and tobacco \$1,365,000.

ACREAGE PRODUCTION AND VALUE OF FARM PRODUCTS

Totals.....	927,000	\$28,998,000

MARYLAND WOOL OF MEDIUM QUALITY.

The number of sheep of shearing age April 1, 1909, was 125,000; average weight of fleece per head, 5 pounds; wool washed and unwashed, 625,000 pounds; per cent. of shrinkage, 45; wool scoured, 343,750 pounds; average value per pound of scoured wool in 1905, 57 cents; 1906, 55 cents; 1907, 55 cents; 1908, 44 cents, and 1909, 55 cents.

Total value in 1909, \$189,063.

CURRENT PRICES OF GRAIN

The following table, furnished by Secretary-Treasurer James B. Hessong, of the Chamber of Commerce, gives the current prices of grain in Baltimore, by months, during the year 1909, and also the average prices for the year.

The average prices of wheat and corn show a decided advance in 1909 over 1908, particularly those of high-grade wheat, while the average prices of oats were less in 1909 than in 1908.

STRIKES AND LOCKOUTS

During the year 1909 the mechanics and laboring classes have been more generally employed than in 1908, while the wages have remained about the same. The average earnings have been greater, because of the employment being more constant. The reduction of 10% made in wages by the Sparrows Point Steel Co. in 1908 was restored in 1909.

The number of strikes and lockouts was less in 1909 than in 1908, there being only 13 during the former year, as compared with 16 in the latter, while the number of persons involved in 1909 was much greater, there being 4,852, as compared with 2,522 in 1908.

The estimated loss in wages in 1909 was \$317,600, almost eight times as great as the loss in wages in 1908, which only amounted to \$41,424.40. Of the 13 strikes 4 were successful, 4 partially so, 2 have not yet been settled and 3 were unsuccessful. Eleven were ordered or endorsed by labor organizations and two were unorganized. One of the strikes was caused by a change in the system of working; 2 because of a demand for an increase in wages; 1 for an increase in wages, and in sympathy with fellow-workmen, who had previously quit work; 2 were in opposition to a reduction in wages; 3 were caused by dissatisfaction with the foreman; a demand that colored workmen be excluded was the cause of another, and 1 was caused by the discharge of 2 men. The strike which involved the greatest number of persons was caused by the introduction of new and improved machinery.

The most serious of the strikes, however, was that of the machinists, which was caused by the introduction of

the piecework system at the Mount Clare Shops of the Baltimore & Ohio R. R.; 265 men were involved, and the estimated loss in wages amounted to \$150,000, while \$27,875 was paid out in strike benefits. This strike began on May 28, 1909. The officials of the B. & O. R. R. and the representatives of the men held many conferences, but have been unable to reach an agreement.

Seven of these strikes occurred in the clothing trade, involving a total of 3,544 persons and an estimated loss in wages of \$150,000.

The following tables will show in detail the industries and occupations in which the strikes occurred, the duration of the same and the number of persons involved:

Synopsis of the Strikes

STRIKE OF MACHINISTS.

On May 28 265 machinists at the Mount Clare Shops of the Baltimore & Ohio Railroad quit work because of the introduction of the piecework system, which the men were pledged to oppose. Shortly afterwards a number of machinists employed at other shops of the Company went out in sympathy. This movement affected the entire system of the Baltimore & Ohio Railroad, and involved about 1,000.

There were many conferences between the officials of the Baltimore & Ohio Railroad and the representatives of the men, but they were unable to reach an agreement. The Chief of this Bureau called to confer with both parties in the dispute, and kept informed about the situation from day to day, with a view of offering its services as mediator, but the strike never reached a stage when it was felt that the services of the Bureau could be of any benefit to the parties concerned.

There were a number of disturbances, both of a minor and serious nature, and it was the most serious strike that occurred during the year. While there were not as many persons involved in this strike as in some of the others, it was more general and of longer duration, and the loss in wages within the State is estimated at \$150,000 and the amount paid out in strike benefits was \$27,875.

While a number of these men have secured positions elsewhere, there are many of them still out, and the strike is considered still on by them, while the Baltimore & Ohio officials claim that as far as they are concerned the strike is at an end.

*Statement of Mr. A. F. Stark, Business Agent and
Representative of the Machinists.*

"The strike was caused by the inauguration by Mr. Joseph B. Harris, Superintendent of Motive Power of the Baltimore & Ohio Railroad, of the piecework system in the Erecting Department of the Mount Clare Shops, which system the men are pledged to oppose. The strike was probably hastened by the fact that the men had understood from some source, which they considered reliable, that many of their number were to be furloughed, which is considered by them equal to a discharge. The men insisted upon being given a reasonable time to consider the piecework proposition, but were refused. They work 8, 9 and 10 hours per day and receive 27, 30 and 32 cents per hour. One hundred and ninety men are now out at the Mount Clare Shops. The men at the Riverside Shops, who went out in sympathy with the Mount Clare men, have returned to work. The Company has taken on 150 men from Baltimore, Philadelphia and other places to fill the positions of the men who are now out at the Mount Clare Shops. The written proposition submitted by the General Committee of Machinists to Mr. J. B. Harris, Superintendent of Motive Power, was refused by him. Every effort was made to avoid this strike, but they were unsuccessful."

*Statement of Mr. J. B. Harris, Superintendent of Motive
Power, Baltimore & Ohio Railroad.*

"Some of the men in the Erecting Department requested that they be put on piecework.

"The change affected between 230 and 240 men of the Mount Clare Shops, and at the Riverside Shops there were over 300 men employed, who never went out.

"Two hundred new men have been taken on at the Mount Clare Shops, and they have never been asked whether they are union men or not.

Mr. Joseph B. Harris, Superintendent of Motive Power, promised to protect all the men who refused to go out and all those who were taken on, and they propose to carry out that part of their agreement.

"They never contemplated paroling the men as anticipated by them.

"The men have been informed that there would be no reduction in the present prices under the piecework system, notwithstanding they would be able to make more, unless improved machinery should be installed, whereby the work would be lessened.

"Mr. Harris stated that there had never been an agreement between the Company and the men whereby thirty days' notice would have to be given in order to change the system of working, and as far as the Company is concerned the strike is at an end."

STRIKE OF WEAVERS AT THE OAKLAND MILLS, CARROLL CO., MD.

Fifty-five weavers employed at the Oakland Woolen Mills quit work on July 13, because the company refused an increase in wages of 25%. This strike threw out of employment about 200 men, women and children. The strike was of short duration, however, lasting only about a week, during which time an agreement was reached, on a basis of about 6% increase, and work was resumed.

STRIKE OF SKINNERS.

Sixty men, women and children, employed at the Hearn Canning Co., Linkwood, Md., quit work on August 23 because the firm refused to exclude colored help. The strike lasted only two days, when they returned to work under the old conditions.

CLOAKMAKERS STRIKE.

On August 25, 13 cloakmakers, employed by Shapiro & Rubenstein, quit work because the firm refused to increase the price paid on certain garments. This strike was followed by the employes of 35 firms, involving 500 cloakmakers, going out in sympathy, and the strike became general. There were many disturbances of a minor nature, and the manufacturers applied for an injunction, which was granted by the court, restraining the strikers from interfering in any way with their employes or business. This was followed by three of the strikers being arrested for violating the injunction, charged with assaulting two cloakmakers who had been brought here from New York to take the places of the strikers. When the cases came to trial they testified as to the identity of the strikers who had assaulted them, and during a hearing to reopen the contempt proceedings they retracted their previous testimony by declaring that they did not know who it was that assaulted them. The court had bench warrants issued at once, and they were arrested, charged with perjury, and were sent to jail in default of \$1,000 bail to answer the charge. When their cases came to trial they were paroled on the condition that they leave the State. Of the three strikers charged with violating the injunction two were found guilty and sentenced to six months in jail each, and one was dismissed. The loss in wages is estimated at \$13,600, and \$2,000 was paid out in strike benefits.

STRIKE OF HAIR SPINNERS.

Twelve men, employed by Fred. Walpert's Mattress Manufacturing Co., quit work on September 30 because the firm refused an increase in wages of 15%. At the request of a committee representing the men a representative from this Bureau called upon the firm with a view of settling the strike by mediation, or arbitration, but

found that some of the strikers' places had been filled, and the firm contended that they had sufficient help for the present and declined the offer of the Bureau, and many of the men found positions elsewhere.

CLOTHING-WORKERS STRIKE.

On October 2, 185 tailors, employed by Hamburger Bros. & Co., quit work because of dissatisfaction with the foreman. After being out one week and sustaining a loss in wages of \$2,500 an agreement was reached, whereby the foreman was transferred to another department, and work was resumed.

CLOTHING-WORKERS STRIKE.

On April 6, 212 tailors, employed by Schloss Bros. & Co., quit work because of dissatisfaction with the foreman. After being out about five weeks and sustaining a loss in wages of about \$19,000 an agreement was reached, whereby the foreman was transferred to another department, and the men returned to work.

STRIKE OF LADIES' TAILORS.

Twenty-three ladies' tailors, employed by Wolf Cohen, struck against a reduction in wages on October 7. This strike, however, was of a short duration, lasting only one week, when the men returned to work at the old scale of wages.

PANTSMAKERS STRIKE.

On April 5, 90 pantsmakers, employed by J. Schoeneman, quit work because of a change in the system of working. After being out ten days a compromise was effected, and they returned to work. The loss in wages amounted to \$1,500.

CLOTHING-WORKERS STRIKE.

On November 12, 24 girls, employed by Schloss Bros. & Co., quit work because of dissatisfaction with the forewoman. This was followed by 260 men and women going out in sympathy, thereby throwing out of employment 400 persons. This Bureau offered its services to the firm as mediator, or arbitrator, in this strike. The Bureau was informed by a member of the firm that, while they appreciated the interest the Bureau had taken in the matter, they did not think the time had arrived when we could be of any assistance, as they were holding daily conferences with the strikers, and expected to reach an agreement in the near future. In case they failed, however, they would be glad to avail themselves of our offer. A compromise was agreed upon on December 30. The loss in wages amounted to \$35,000, and \$1,000 was paid out in strike benefits.

CLOTHING-WORKERS STRIKE.

On November 23, 37 tailors, employed by Harris Silverman & Sons, who were in sympathy with the strikers of Schloss Bros. & Co. and Henry Sonneborn & Co., demanded an increase in wages, and because the same was not granted quit work, and after being out about four weeks an agreement was reached, whereby they returned to work. The estimated loss in wages amounted to \$1,000.

CLOTHING-WORKERS.

On February 15, 250 tailors, employed by Strouse & Bros., quit work because two of their number were discharged. The strike continued for five weeks, when they returned to work. The loss sustained in wages amounted to about \$15,000.

CLOTHING STRIKE.

On December 20, 2,500 men and women, employed by Henry Sonneborn & Co., walked out because of the introduction of improved machinery in their factory, which caused dissatisfaction. This strike was the largest in point of number that occurred during the year, but not in loss of wages, which amounted to \$75,000.

After being out about three weeks a compromise was effected, by which they returned to work.

IN LABOR CIRCLES

There were few important events to occur during the year 1909 in labor circles in the State of Maryland.

The Baltimore Federation of Labor brought to the notice of the city government the violation of the eight-hour law, by one of the contractors while at work on a section of the city's outgoing sewerage system, which was corrected.

In an opinion of City Solicitor Poe to Mayor Mahool as to what constitutes the prevailing rate of wages to be paid by the city he said: "I must adhere to the principle laid down by me in my letter of September 30, 1908, to the Water Engineer, when I had under consideration the question of the current rate of wages for day laborers. In that letter I used the following language:

" 'In order, therefore, to arrive at what constitutes the current rate of per diem wages regard must be had, in the first instance, to the locality where the work is to be performed, and then effort should be made to ascertain what per diem wages, irrespective of the hours that constitute a day's work, are being paid by all employers of labor in that locality, including, among others, an employer of labor, the Mayor and City Council of Baltimore, and also contractors with the Mayor and City Council of Baltimore. It may be that some contractors employ more laborers of a certain grade than other contractors. This fact should be taken into consideration in arriving at what is current rate of per diem wages. In other words, the current rate is the fair general average that is being paid per day at the time the rate is to be fixed by all those who are employers of that particular class of laborers in the locality in question.'

"Bearing in mind the principle thus announced, let us take the case of carpenters, for the purpose of illustrating. Suppose there are 3,000 carpenters in the city, and that 1,500 receive \$3.50 per day and the remaining 1,500 \$3 per day. The current rate of wages that the city and city contractors would be bound to pay would be \$3.25. This would constitute the minimum figure, but there would be nothing to prevent the city or city's contractors from paying more than \$3.25.

"Of course, it is the duty of each department before which this question comes up to get the best information available as to the various scales of wages paid and the number of men receiving the different rates of wages, and to make a proper calculation by applying the rule that I have laid down."

The most difficult strike with which the Federation had to deal during the year 1909 was that of the machinists employed by the Baltimore & Ohio R. R., who struck against the piecework system, which the railroad company introduced in their Mount Clare Shops.

The men went out in May, 1909, and the trouble up to this date has not been adjusted.

The celebration of Labor Day, under the auspices of the central body, held at Electric Park, was one of the most interesting features in labor circles, and was largely attended.

The Fifth Annual Convention of the Maryland State Federation of Labor convened on Tuesday, September 21, 1909, at 10.30 A. M., at the Building Trades Hall, 500 East Fayette Street, Baltimore, Md., 22 local organizations being represented. President Abe Gordon addressed the delegates, setting forth in glowing terms the good that could be accomplished by the Convention. The Convention was in session three days, and transacted considerable business. Among the most important resolutions adopted was the one urging upon the incoming Legislature the necessity of amending the Child-Labor

Law by raising the age limit from 12 to 14 years, and that of protesting against the employment of convicts in the manufacture of goods that come in competition with free labor, and requesting that they be employed in building roads for the State, or in some other capacity in which they will not compete with free labor. All members were impressed with the importance of purchasing only goods bearing the Union Label.

The following officers were elected: William A. Bryan, President; George M. Henderson, Secretary and Treasurer.

The Convention adjourned to meet in Washington, D. C., in 1910.

The Following Items Were Gathered From The Various Local Unions.

Local No. 104, Upholsterers—Had a very prosperous season and could not supply sufficient help.

Local No. 244, Cumberland Typographical Union—Cut out the exchange and borrowing of local advertisers' plates and mats, unless reproduced in type.

Local No. 12, Typographical Union—A scale committee is now engaged in an effort to raise the wages of those members who are employed in the book and job offices, the scale for which is now below that of all other large cities.

Local No. 25, Commercial Telegraphers—Organization efforts during the year are progressing very favorably, owing to better business conditions.

Local No. 157, Cumberland Stationery Engineers—Secured an eight-hour workday.

Local No. 37, Portable and Hoisting Engineers—Report a very prosperous year.

Local No. 489, Cumberland Plumbers, Gas and Steam Fitters—Dull season.

Local No. 30, Rammers—Good season.

Local No. 137, Cumberland Flint Glass Workers—Established a sick benefit department, secured better working rules and conditions and increased the number of membership 35%.

Local No. 7, Elevator Constructors—Secured improved working conditions and increase in wages.

Local No. 32, Coopers—Have not been able to better their conditions.

Local No. 4, Cloakmakers—General strike, and still on.

Local No. 1598, Cabinet-makers—"Takes all of our energy to maintain our present conditions against cheap foreign labor."

Local No. 29, Carpenters and Joiners—The conditions have not improved during the year.

Local No. 44, Bookbinders—Obtained an eight-hour workday.

Local No. 123, Women's Bindery—Obtained an eight-hour workday.

Local No. 173, Beer Drivers—Increased pay for overtime and better conditions generally.

Local No. 16, Bridge and Structural Iron Workers—Trade good and a demand for more men.

Local No. 40, Musicians—The employment of out-of-town bands, composed of Italians, at the summer resorts during the summer months, for the past six years, has materially added to the hardships of the local musicians. Repeated appeals have been made to the management of the different resorts to recognize home talent, but in vain.

TABLE A.

Gives the names of the presidents, the names and addresses of the recording secretaries of the 65 local unions, reporting the minimum union rate of wages and the number of hours of labor required per day, the place and day of meeting.

TABLE A.

REPORT FROM LABOR UNIONS UP TO DECEMBER 31st, 1909.

NAME OF ORGANIZATION.	NAME OF PRESIDENT.	NAME OF SECRETARY.	ADDRESS OF SECRETARY.	Hours Worked Per Day.	MINIMUM UNION RATE OF WAGES PER DAY.	PLACE OF MEETING.	DAY OF MEETING.
Bakery and Confectionery Workers' Union, No. 246.	Oswald Weber.	Joseph Soethe.	196 Madison St., Cumb'd.	9	\$1.67	Third Nat'l Bank Building, Cumberland.	Saturday

The Baltimore Federation of Labor is composed of Delegates representing the various Local Unions. Its Officers are: Edwin Hirsch, President; George M. Henderson, Secretary. Meets Wednesday nights at Building Trades Hall, 500 E. Fayette Street.

Twenty-Fifth Annual Convention of Officials of Labor Statistics.

The Twenty-fifth Annual Convention of Officials of Labor Statistics of America met at Rochester, N. Y., in joint session with the International Association of Factory Inspectors, at Convention Hall, Tuesday, June 15, 1909, at 10 o'clock A. M. The joint session was called to order by State Deputy Chief Factory Inspector Walling, of New York. Mr. C. V. Hartzell, of Harrisburg, Pa., was appointed temporary chairman. Mr. Hartzell introduced Mayor Edgerton, of Rochester, who delivered an address of welcome, which was very ably seconded by Mr. Woodward, of the Chamber of Commerce, who invited the members of both associations for a car ride Wednesday afternoon to the parks and other places of interest, and also to be the guests of the Chamber of Commerce at a dinner, to be given at the Ontario Beach Hotel.

The addresses of welcome were very appropriately responded to by the chairman, and the cordial invitation of Mr. Woodward, of the Chamber of Commerce, was accepted. The meeting adjourned until 2 P. M., the Factory Inspectors to meet in the hall of the Chamber of Commerce, and the Officials of Labor Statistics to meet at the Powers Hotel. At the afternoon session, in the absence of Hon. Charles P. Neil, National Commissioner of Labor and President of the Association, Second Vice-President Commissioner Daugherty, of Oklahoma, presided. There were 22 members present, representing 17 State Bureaus. Mr. Stewart, of the United States Census Department, Washington, read an interesting paper on

"Co-ordination in Schedules and Co-operation in the Collection of Statistics by the Federal Census Office and the State Statistical Bureaus." He recommended that the schedule used by the Bureau of the Census in collecting the statistics of manufactures should be permanently adopted as the basis for similar work by the State statistical offices. Mr. Stewart recommended that the State bureaus omit the collection of statistics of manufacturing industries during the census year 1910, with a view to saving expenses to the State bureaus and to avoid annoyance to manufacturers by having national and State officials call for the same class of statistics.

In return Mr. Stewart said: "The Census Office will make a special effort to complete the canvass in the co-operative States in advance of its completion in other States; that the returns will be tabulated as rapidly as possible and the results given to the State bureaus for inclusion in their reports, somewhat in advance of publication by the Census Office." This general scheme of co-operation between the Census Bureau and the States was adopted, as far as it was possible for them to do so, and a vote of thanks extended to Mr. Stewart for the paper presented.

An interesting joint session of Labor Commissioners and Factory Inspectors was held at the Chamber of Commerce Hall, Thursday morning, at 9 o'clock. The program was as follows:

General subject: "Co-operation or Co-ordination Between Statistical Work and Factory Inspection."

1. Factory Inspectors as collectors of statistics.
2. Statisticians in charge and directing Factory Inspectors.
3. The advantage vs. the disadvantage of one association for Bureau of Statistic Officials and Factory Inspectors.

4. Financial features.
5. Issuance of general reports.
6. Consideration of official organ.

At the evening session, at Ontario Beach Hotel, Thursday, at 8 P. M., the name of the Association was changed from Association of Officials of Bureau of Labor Statistics of America to the International Association of Officials of Bureaus of Labor.

The Convention adjourned to meet at Hendersonville, N. C., at a time to be selected by the Executive Committee.

IMMIGRATION

With the return of prosperity, the tide of immigration turns, and while the number of immigrants arriving at the Port of Baltimore in 1909 exceeded that of 1908, which will be remembered as a year of idleness among the laboring classes, it does not equal that of 1907, when the entire country enjoyed prosperity.

From the following tables, furnished by the Immigration Service of the Department of Commerce and Labor, for the calendar year 1909, of immigrant aliens admitted at the Port of Baltimore, it will be seen that 25,140 arrived during the year 1909, as compared with 8,472 in 1908 and 66,714 in 1907. Of the 25,140 admitted in 1909 17,801, or 71%, were males and 7,339, or 29%, were females, while in 1908 54 2-5% were males and 44 3-5% were females, and in 1907 there were 76 2-3% males and 23 1-3% females. In 1909 3,364, or 13½%, were under 14 years of age, while in 1908 25 4-5% were under 14 years and 11 1-3% in 1907.

The number over 45 years of age in 1909 was 1,269, or about 5%, as compared with 7% in 1908 and 4 1-6% in 1907. The total amount of money shown by the immigrants upon entering the Port of Baltimore in 1909 was \$420,677, an average of \$16.73 1-3 for each person, while the average in 1908 and 1907 was \$20.22 and \$14.72 respectively.

Of the total number landed 3,887, or 15½%, had been in this country before, while the same applied to 7% in 1908 and 4% in 1907.

Of the 21,776 who were over 14 years of age 7,300, or 33 1-3%, were illiterates, and the same applied to 23% in 1908 and 33 2-3% in 1907.

Of the 25,140 immigrants that entered our port in 1909 European countries furnished 25,089, Asia 20, other countries 31.

Of the 25,089, who came from European countries, the Russian Empire furnished 11,202, or nearly half; Hungary 6,107, Austria 5,308, German Empire 1,662, while the United Kingdom, which includes England, Ireland, Scotland and Wales, furnished only 19.

One of the most striking features shown is that out of a total of 25,140 immigrants who entered our ports only 2,577, or 10 1/4%, gave Maryland as their destination.

NEW INCORPORATIONS IN MARY- LAND FOR 1909

Complete List of New Incorporations in Baltimore
City and the Counties, with Location and Capital
Stock, From January 1st, 1909 to December
31st, 1909.

The number of new incorporations, as shown by the records, in the city of Baltimore during the year 1909 was 636, including 29 building and loan associations, with capital stock amounting to \$15,420,522. This shows a decided increase over the year 1908, both in point of number as well as capital stock, as there were only 448 new incorporations during that year, with capital stock amounting to \$13,763,560. The increase in capital stock in 1909 over 1908 was \$1,656,962.

The new incorporations in the counties in 1909 exceeded those of 1908, both in number and amount of capital stock. There were 193 in 1909, with a capital stock amounting to \$6,098,170, while in 1908 there were 149, with capital stock amounting to \$2,055,097.

The total number of new incorporations in the entire State, including building and loan associations, in 1909 was 829, with capital stock amounting to \$21,518,692, as compared with 597 new incorporations, with capital stock amounting to \$15,808,657, in 1908, showing an increase in 1909 over 1908 of 188 new incorporations and \$5,710,035 in capital stock. Of the 636 incorporations recorded in Baltimore City 377 were new enterprises with capital stock, 135 were without capital stock, 29 were

building and loan associations, 75 were miscellaneous records, 6 decreased their capital stock and 20 increased their capital stock, which is shown by the following brief recapitulation:

RECAPITULATION FOR BALTIMORE CITY.

New Incorporations, with Capital Stock.....	371
New Incorporations, without Capital Stock.....	135
Building and Loan Associations.....	29
Miscellaneous Records	75
Increased Capital Stock.....	20
Decreased Capital Stock.....	6

Total number of New Incorporations.....636

Capitalization of New Incorporations.. ..\$ 8,955,522

Capitalization of Building and Loan Assns... 6,465,000

\$15,420,522

Increase of Capital Stock.....\$4,393,000

Decrease of Capital Stock..... 630,970

Net increase of Capital Stock.....\$3,762,030

The new incorporations with capital stock amounting to \$100,000 and over are divided as follows: 17 for \$100,000 each, 1 for \$125,000, 3 for \$150,000, 6 for \$200,000, 1 for \$250,000, 2 for \$300,000, 4 for \$500,000, 2 for \$520,000, 1 for \$650,000, 1 for \$1,300,000 and 1 for \$1,500,000. The remainder were for amounts less than \$100,000, as shown by the following table, which is a complete record of all new incorporations:
